

SWIFT - 5

Ahmed Yossef

IOS APPLICATION
 **DEVELOPMENT**

Agenda

- Casting
- Protocol
- Pods
- HTTP Communication

Casting

Protocols

```
var obj = myArray.objectAtIndex(0) // AnyObject  
var name:String = obj as! String
```

It is about converting a parent to child
converting a generic object to specific object using (as)

Protocol

Protocols

```
protocol myProtocol{  
    func (input:Type)  
}
```

It defines a set of non implemented methods
Used to standardization

Pods

Pods

```
target "projectName" do
  use_frameworks!
  pod 'Framework', '~> 3.1.4'
done
```

It is a simple way to integrate with external libs and APIs

HTTP Communication

Network Comm.
